

# Wisco Products Filler Caps and Accessories

Serving fluid system needs for markets worldwide

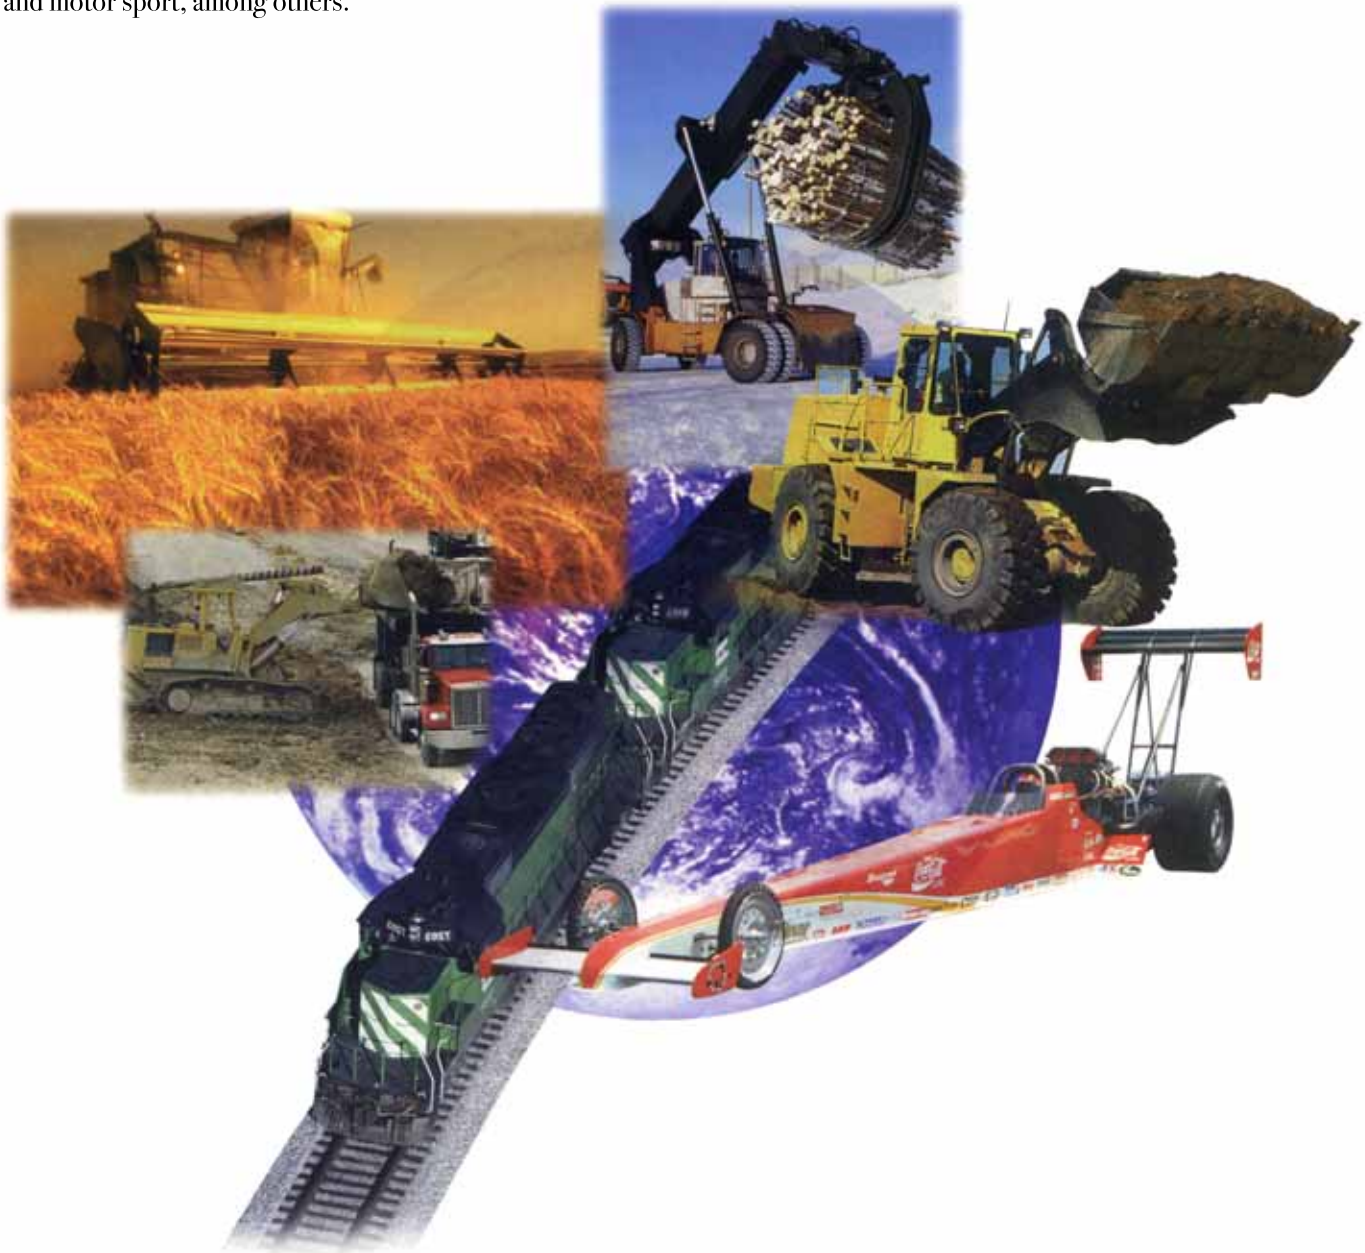

Wisco Products – a precision manufacturer and assembler – produces a complete line of filler caps, necks and accessories for a wide variety of oil, fuel, hydraulic oil and water systems on heavy machinery and other equipment. Markets served include heavy-duty transportation, off-highway equipment, mining, construction, industrial, agricultural, locomotive and motor sport, among others.

## Meeting customer expectations for quality and performance

Regardless of your fluid containment application, you probably require certain features that assure reliable function and rugged performance whether in the plant or in the field – and whether part of an operating

system or for storage only. Whatever your needs, Wisco Products knows filler system applications.

Our experience and expertise mean you get the right product for the right job. Our in-house fabricating, welding and finishing capabilities offer you the highest quality and most cost effective solutions.

## Providing a family of products for every system

Wisco Products has developed a series of products to match any filler application you may have.

- [300 Series](#) -- with various style caps, necks, strainers and mounting configurations, this product series meets most basic applications for vented and non-vented fuel, oil and water systems.
- [400 Series](#) -- Also offering the full complement of caps, necks, strainers and mountings, this series is designed

to handle pressurized radiator and hydraulic systems for all heavy duty applications.

- [600 Series](#) -- This series, with its larger sealing area, is intended for vented and non-vented fuel and oil systems
- [700 Series](#) -- Similar to the 300 Series for vented and non-vented fuel, oil and water applications, this product line offers a much larger sealing area for more efficient filling access.

- [Plastic Flush Mount](#) -- This product is designed for high performance fuel systems such as used on race cars.
- [Special and custom designed filler caps and necks](#) -- We're also experts at custom solutions for special filler needs (see below). Our engineering, sales and operating staff will work with you to design and build the part you need. We construct all custom caps and necks from top quality materials. We thoroughly test and inspect before shipment.

### Call us first!

Wisco Products specializes in providing a full line of fluid filler components for all your engine and fluid containment systems. Call Wisco first at 1-800-367-6570 high quality performance product and service on all your filler product needs.

*Service and performance you can count on.*
